

Nature's Touch Commitment to Climate Action

Agriculture and climate change are deeply interconnected. Shifting weather patterns driven by climate change directly affect crop production, while certain farming practices contribute to greenhouse gas (GHG) emissions. This dynamic poses serious challenges to global food security, making it critical for food companies to reduce their carbon footprint.

To do our part to address this issue, Nature's Touch has committed to reducing its scope 1 and 2 greenhouse gas emissions by 42% by 2030, based on a 2024 baseline. As part of this commitment, Nature's Touch produces an annual GHG Inventory, done in accordance with the Greenhouse Gas Protocol. Below are the findings from this exercise.

Our 2025 GHG Emissions

Scope	Category	Emissions (TCO ₂ e)
Scope 1	1. Direct Emissions	2,289.50
Scope 2	2. Indirect Emissions	5,363.30
Scope 3	3.1 Purchased Goods & Services	192,348.83
Scope 3	3.2 Capital Goods	Not relevant, not calculated
Scope 3	3.3 Fuel & Energy Related Activities	1,978.56
Scope 3	3.4 Upstream Transportation & Distribution	93,805.87
